## Subscription of Cloud Computing Platform for OSC

### TERMS OF REFERENCE

#### Background:

Cloud computing has revolutionized how organizations manage and utilize technology resources. It offers scalability, flexibility, and cost-effectiveness by providing Internet access to a pool of computing resources. A subscription-based model allows organizations to pay for the resources they use, promoting efficiency and agility in their operations.

The Office of the Solicitor General intends to leverage cloud computing, aligning with the Government's "Cloud First Policy." This shift aims to enable seamless, immediate access to a configurable pool of computing resources, including networks, servers, storage, applications, and services, adhering to the mandate to modernize its server and backup infrastructure partially.

This strategic migration to the cloud will aid the agency in curtailing ICT acquisition and operation costs, fostering operational excellence, bridging security gaps, enhancing employee productivity, and facilitating the development of robust online services.

#### Objective:

The OSC's primary objective is to provide the organization with a predictable cost structure while enabling the flexibility to scale resources as needed. With 'top-up' functionality, the OSC can increase its commitment balances at any time, ensuring uninterrupted access to resources and accommodating sudden spikes in demand without disrupting operations. The OSC aims to optimize cost-efficiency while adapting to evolving organizations' requirements in the digital landscape.

The subscription to cloud computing services will maintain the performance and functionality of its systems and ensure its compatibility with the existing setup of OSC application systems and databases.

#### Terms:

#### 1. Scope - Subscription of Cloud Computing Platform for OSC

<sup>1</sup> DICT Department Circular (DC) No. 010 Series of 2020 Amending DC 2017-002 re: Prescribing the Philippine Government's Cloud First Policy, which states that all government agencies shall adopt cloud computing as the preferred ICT deployment strategy for the delivery of government services.
